Java Backend Developer

Professional Summary

Java Backend Developer with hands-on experience designing and developing secure, scalable REST APIs using Java, Spring Boot 3, Spring Security, JWT Authentication, Spring Data JPA, Hibernate ORM, and MySQL. Proficient in layered architecture (Controller, Service, Repository, DTO), global exception handling, transactional business logic, and role-based access control (RBAC). Experienced in API testing with Postman, version control with Git/GitHub, and backend debugging. Strong foundation in Object-Oriented Programming (OOP), Data Structures and Algorithms (DSA), DBMS, and Operating Systems.

Technical Skills

Languages: Java, Python, SQL, JavaScript

Backend: Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate ORM, RESTful APIs, Microservices Fundamentals, JWT Authentication, Role-Based Access Control (RBAC), Postman

Database: MySQL, PostgreSQL, JPA, Hibernate, JPQL, Flyway Migrations

Tools & DevOps: Git, GitHub, Maven, Docker, Docker Compose

Core Concepts: Object-Oriented Programming (OOP), Data Structures and Algorithms (DSA), DBMS, Operating Systems, Computer Networks, MVC Architecture, Layered Architecture

Frontend (Basic): HTML, CSS, React.js, Next.js

Projects

GymPartner – Gym Partner Matchmaking Platform | *GitHub* | *Live*

- Developed a Java 21 Spring Boot backend exposing 15+ RESTful API endpoints for user registration, authentication, profile management, match requests, and match lifecycle management, integrated with a React 19 frontend.
- Implemented Spring Security with stateless JWT authentication, BCrypt password hashing, and Role-Based Access Control (RBAC) securing 100% of protected API endpoints.
- Engineered a 6-state finite state machine (PENDING, ACCEPTED, REJECTED, CANCELLED, TERMINATED, EXPIRED) with scheduled CRON jobs for rate limiting, match expiry, and reliability scoring.
- Built real-time communication using WebSocket (STOMP) with transactional email fallback for offline users, enabling instant notification delivery across active matches.
- Managed relational data using MySQL, Spring Data JPA, and Hibernate ORM; integrated Cloudinary for image storage and implemented layered architecture using Controller, Service, Repository, Entity, and DTO patterns.

Transport AI – AI-Powered Transport Receipt Processing Platform | *GitHub*

- Built a full-stack receipt-processing platform using Java 17, Spring Boot, PostgreSQL, Spring Data JPA, Next.js 16, and React 19, exposing 20+ REST API endpoints for authentication, file uploads, batch processing, CRUD operations, search, and reporting.
- Integrated Google Gemini API to extract 18 structured logistics fields from transport receipts, incorporating document classification, JSON validation, and automated data processing workflows.
- Implemented Spring Security, stateless JWT authentication, PBKDF2 password hashing, email verification, and request rate limiting to secure application access.
- Generated individual, bulk ZIP, and consolidated Excel reports using Apache POI, automating transport data reporting and export workflows.
- Designed PostgreSQL schema with version-controlled Flyway migrations and containerized the application using Docker and Docker Compose for reproducible local and production deployments.

Education

Vellore Institute of Technology

B.Tech in Computer Science Engineering – Artificial Intelligence & Machine Learning

Bhopal, India

Sep 2023 – Jun 2027

- CGPA: 8.65 / 10

Achievements

- 200+ DSA problems solved on LeetCode, covering arrays, strings, recursion, stacks, queues, linked lists, trees, graphs, and dynamic programming.
- Active competitive programmer on Codeforces, consistently practicing algorithmic problem-solving and optimizing time/space complexity.

Certifications

- **Postman API Fundamentals Student Expert** – REST API testing, HTTP request handling, and REST API workflow validation using Postman.
- **NPTEL Cloud Computing** – Elite Certificate, IIT Kharagpur – Cloud computing fundamentals, service models (IaaS, PaaS, SaaS), and cloud architecture.
- **Applied Machine Learning in Python** – University of Michigan – Supervised learning, model evaluation, and scikit-learn.
